WORK EXPERIENCE

Feeding Children Everywhere, Longwood FL   **January 2017 – December 2018**
Associate Developer

- Primary developer for all web properties, apps, and in-house software.
- Worked with graphic designers to create landing pages and HTML/CSS MailChimp email blasts for marketing purposes.
- Set up Google Analytics tracking across all web properties and reported data to Marketing Director. Optimized site-map for search engines.
  Full Cart/Fed 40
- Developer and maintainer of food-ordering web & mobile application with 6,000+ downloads providing meals to more than 1,000 food-insecure households daily (React Native, Flutter).
- Designed and implemented shared mobile & web app API and backend (Node.js & AWS).
- Built and maintained responsive & mobile-friendly front-end website.
- Led app development through multiple upgrades, including a complete visual overhaul and full platform upgrade and rebrand.
- Implemented Stripe payment processing on web & mobile.
  Internal Tools
- Built several internal web apps as needed for both operations & marketing teams.
- Created a web utility that generates PDFs of packaging labels with correct expiration dates based on meal packaging date.

PROJECTS

HackRiddle, Daytona FL   **October 2016**
tattle.tech
