- **Familiar**: Python, PHP, C#, C, Google Analytics

WORK EXPERIENCE

Feeding Children Everywhere, Longwood FL   **January 2017 – December 2018**

Associate Developer

- Primary developer for web properties, mobile apps, & in-house software. Worked closely with marketing team, graphics designers, & outside consultants.

Full Cart/Fed 40

- Developer and maintainer of food-ordering web & mobile application with 6,200+ downloads providing ~1,568 pounds of free food to ~588 food-insecure users weekly.
- Designed and implemented application API & back-end using AWS Lambda & API Gateway. Built and maintained responsive front-end website in HTML5/CSS3 & jQuery.
- Carried out 2 complete app re-designs and fully re-wrote existing React Native app using Flutter. Changed app experience from simple form to a multi-view selection process.
- Implemented Stripe payment processing on web & mobile as well as Spanish localization in React Native & Flutter mobile applications.

Internal Tools

- Built web applications for information storage and management, template-based document generation, and notification workflows (HTML, CSS, JS, AWS, & Node.js).

PROJECTS

HackRiddle, Daytona FL   **October 2016**

tattle.tech

- Worked with a team of 5 other students to develop an online university abuse reporting & response system. **Won 1st place in hackathon's anti-bullying category**.
- Primarily developed Chrome extension for reporting cyber-bullying (HTML/CSS, & JS).

EDUCATION

Valencia College, Orlando FL   **2015 – 2017**

A.A. focused on Information Technology

- **Courses**: C, Java, Object-Oriented Design, Database Systems, Statistics, Discrete Math
